

ARMOR-50 SYSTEM

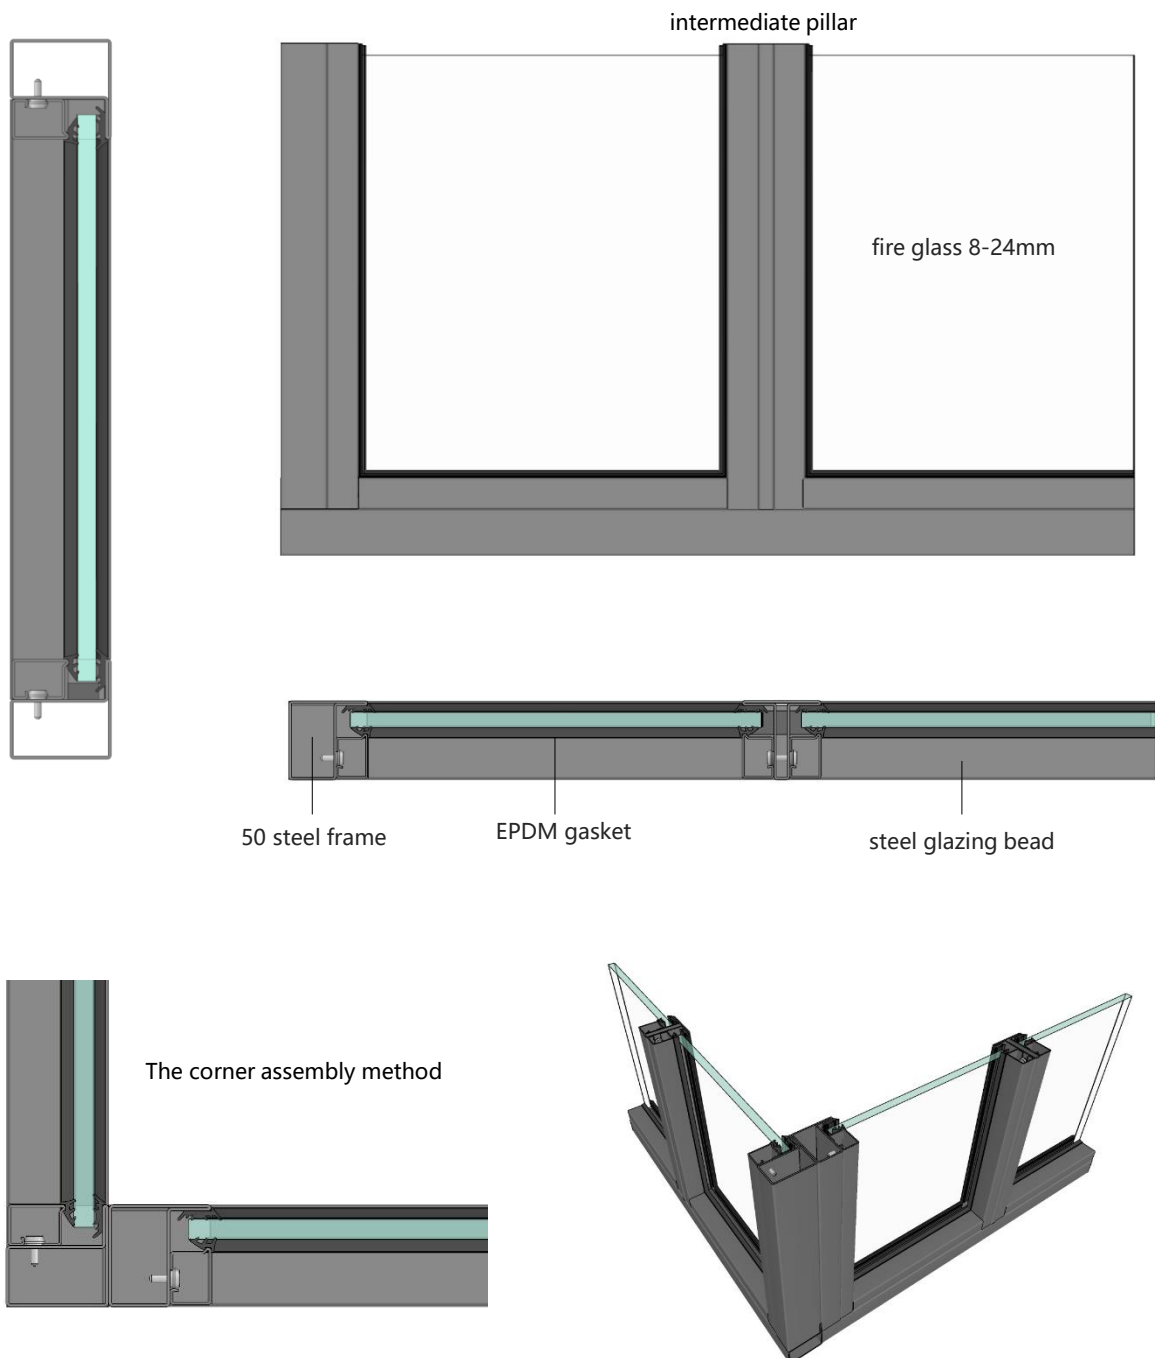

50 Steel Partition(non Fire-resistant)

The Amor 50 series of steel profiles are made from 1.5mm high-quality galvanized steel plate, cold-formed into closed-cavity profiles. The design of the profiles is simple and practical, with a narrower visible frame and mullion compared to competing products. It is a steel partition product that combines functionality, reliability, and economy, distinguished by its narrow frame.

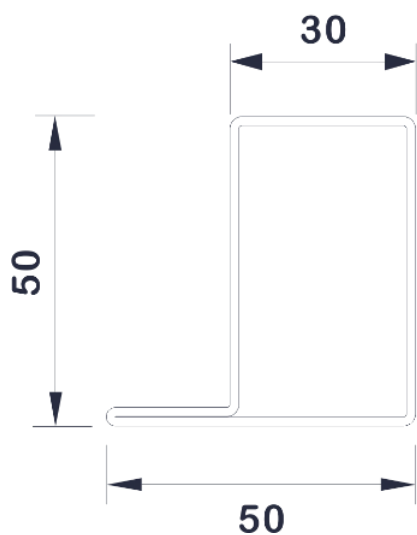

50 Steel Partition (Fire-resistant)

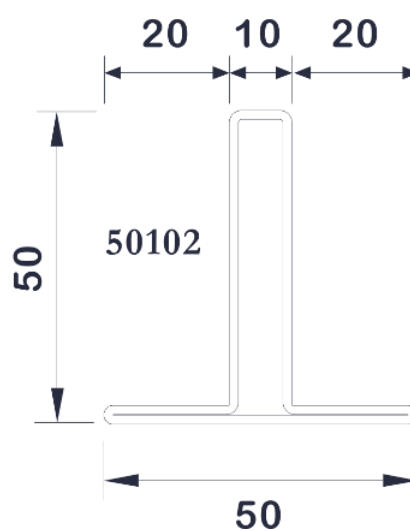

The Amor 50 series of steel profiles, combined with single-layer glass ranging from 8-24mm thickness, forms fire-resistant system. This system achieves a high standard of fire resistance with a maximum rating of 90 minutes for integrity, meeting the stringent requirements for fire performance in modern construction.
